PROFESSIONAL SUMMARY

Senior Fullstack Engineer with 5+ years of experience building and scaling cloud-native applications using React, Node.js, and AWS. Strong expertise in microservices and hexagonal architecture, performance optimization, and technical leadership. Proven track record of delivering high-impact solutions, improving system performance, and mentoring engineering teams in fast-paced environments.

PROFESSIONAL EXPERIENCE

Millicom (via Zerviz Technologies) — Sr. Fullstack Developer

March 2026 – Present

International telecommunications company delivering mobile, broadband, and digital services in Latin America.

- Delivered high-performance frontend applications using React, Vue.js, and Next.js, improving user experience and reducing load times across key interfaces.
- Built and scaled backend services with Node.js and Ruby on Rails, applying clean architecture principles to ensure maintainability and reliability.
- Designed and optimized REST APIs within a microservices architecture, enabling scalable and modular system growth.
- Integrated multiple third-party services, implementing secure authentication and authorization mechanisms to protect user data.
- Improved database performance by designing and optimizing PostgreSQL schemas and queries, supporting high-traffic operations.
- Reduced API response times and system latency by implementing Redis-based caching strategies.
- Collaborated cross-functionally with product, design, and engineering teams to deliver features aligned with business goals.
- Streamlined deployment and release processes by leveraging Docker and CI/CD pipelines, improving delivery speed and reliability.

Technologies:

React, JavaScript (ES6+), Node.js, Express, Ruby on Rails, PostgreSQL, Docker, REST APIs, CI/CD, Tailwind CSS, AWS

Higher Bit Solutions — Sr Fullstack Engineer / Tech Lead (Contract)

Sept 2025 – Apr 2026

Startup focused on custom software, AI, and automation solutions for business clients.

- Led technical roadmap and architectural decisions for multiple production systems.
- Designed and implemented end-to-end solutions using Django, Node.js, React, and PostgreSQL.
- Built scalable, secure APIs with validations, pagination, transactions, and automated testing.
- Developed complex dashboards and admin interfaces using React, Next.js, and TypeScript.
- Managed AWS infrastructure (ECS, ECR, RDS, S3, CloudFront, Cognito, VPC, IAM).
- Implemented CI/CD pipelines, monitoring, and automated deployments.
- Mentored junior developers, conducted PR reviews, and enforced coding standards.
- Collaborated directly with stakeholders to translate business requirements into technical solutions.

Project: Marfil Platform (ERP-like system)

ERP platform focused on administrative, accounting, and operational management for companies, with modules for inventory, quotes, reports, and internal process automation. It stands out for its flexibility and adaptability to different business areas.

Project: Hemisferio Platform

Comprehensive platform for the operational and commercial management of service and installation companies.*

It allows you to manage customers, product and raw material catalogs, projects, quotes, quick sales, task planning, operation history, reports, and approval flows. It includes dashboards, user and role management, and key process automation.

Technologies:

Technologies: Python, Django, PostgreSQL, React, Next.js, TypeScript, Tailwind CSS, Jest, Vite, Docker, ECS/ECR, RDS, S3, CloudFront, Cognito, IAM, SES, Amplify, VPC, Secrets Manager, CI/CD, Terraform entre otros.

ProDoctivity SRL — Sr Fullstack Developer

April 2023 – March 2026

Business management and process automation platform.

- Developed fullstack features using React, TypeScript, Node.js, Docker, and MongoDB.
- Designed and implemented microservices to support core ERP business processes.
- Acted as technical reference for frontend and backend decisions.
- Assisted team members with troubleshooting, architecture, and best practices.
- Supervised and mentored interns through onboarding, code reviews, and continuous feedback.

Technologies:

React, TypeScript, Node.js, Docker, MongoDB, C#, Playwright.

IMarket — Fullstack Developer (Contract)

Nov 2024 – May 2025

Software platform for administrative and accounting management.

- Developed RESTful APIs and implemented business logic and validations.
- Designed database models, migrations, and optimized queries.
- Improved performance in critical operations.
- Built reusable frontend components and responsive user interfaces.
- Implemented application state management and API consumption services.

Technologies:

Angular, TypeScript, .NET 8, C#, Docker, PostgreSQL.

Freelance Projects — Fullstack / Web Developer

Nov 2020 – April 2023

- Delivered multiple freelance projects including SPAs, PWAs, and fullstack systems.
- Transformed UI/UX designs into production-ready applications.
- Integrated frontend and backend systems using REST APIs.
- Ensured performance, accessibility, and cross-browser compatibility.
- Collaborated closely with designers using Figma and modern UI frameworks.

Technologies:

Angular, TypeScript, .NET 8, C#, Docker, PostgreSQL., Ruby on Rails, PHP, Figma among others.

PERSONAL PROJECTS

StockHex — Inventory Management System

- Designed using Hexagonal Architecture for scalability and maintainability.
- Real-time stock tracking, movements, and item updates.
- Backend built with .NET 8 and SQL Server.

Tech: .NET 8, C#, SQL Server, JWT, Swagger, Docker Compose.

GitHub Repository

OwnOrbit — Lead Software Engineer

Scalable property rental management platform.

- Designed global system architecture using Microservices, SOLID, and Clean Architecture.
- Developed Node.js/TypeScript microservices with Docker and gRPC.
- Built responsive web and mobile interfaces with React and React Native.
- Implemented monorepo structure with shared packages and CI/CD-ready setup.
- Established code quality standards (ESLint, Jest, commitlint).

Tech: Node.js, TypeScript, Express, Docker, NGINX, React, React Native, Tailwind CSS, gRPC.

CERTIFICATIONS

AWS Certified Cloud Practitioner - Ongoing

Introduction to Model Context Protocol - Anthropic Education

Introduction to agent skills - Anthropic Education

Claude Code in Action - Anthropic Education

Building with the Claude API - Anthropic Education

SKILLS

Core Stack

- Frontend: React, Next.js, TypeScript
- Backend: Node.js, Express.js
- Databases: PostgreSQL, MongoDB

Architecture & Cloud

- Microservices, Monorepos, Clean / Hexagonal Architecture, SOLID
- AWS (ECS, RDS, S3, CloudFront, Cognito, IAM, VPC)
- Docker, CI/CD, Terraform, NGINX

Tools & Practices

- Git, GitHub, Postman, Swagger, Jest
- Agile / Scrum, Code Reviews, Technical Documentation
- AI Tools: Copilot, Cursor, Windsurf

EDUCATION

Systems Engineering - Universidad Tecnológica de Santiago (UTESA) – 2017-2024

LANGUAGES

- Spanish: Native
- English: Intermediate (B1 – improving, technical communication)
