

WADDIMI SAINT-LOUIS

Senior Full Stack Engineer | AI & Cloud

shenryvladimil@gmail.com

1-829-504-1112

[Linkedin](#) [Github](#) [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 5+ years of experience building scalable, cloud-native, and AI-powered applications. Strong expertise in React, Next.js, TypeScript, Node.js, Python, PostgreSQL, microservices, and AWS.

Experienced in integrating LLMs, AI APIs, and automation into production systems, with a strong background in system architecture, cloud infrastructure, CI/CD, performance optimization, and technical leadership.

PROFESSIONAL EXPERIENCE

ProDoctivity SRL — Sr Fullstack Developer

April 2023 – Current

- Developed and delivered full-stack features using React, TypeScript, Node.js, Docker, and MongoDB.
- Designed and implemented microservices supporting core ERP business processes and backend workflows.
- Built a production-grade RAG-based AI document assistant using OpenAI LLMs, enabling users to upload documents and interact with their content through natural-language queries.
- Implemented AI-powered document classification, automatically analyzing uploaded documents and assigning the appropriate documentType.
- Designed and implemented an independent MCP service in Rust, integrated with the Node.js backend to expose application data and services to AI-powered workflows.
- Integrated LLM capabilities, RAG, and AI automation into existing business workflows and backend services.
- Acted as a technical reference for frontend and backend architecture, implementation decisions, and engineering best practices.
- Assisted team members with troubleshooting, architecture, code reviews, and technical problem-solving.
- Supervised and mentored interns through onboarding, code reviews, and continuous feedback.

Technologies:

Built a RAG-based AI document assistant using OpenAI LLMs, enabling users to upload documents and interact with their content through natural-language queries.

Higher Bit Solutions — Sr Fullstack Engineer / Tech Lead (Contract)

Sept 2025 – Apr 2026

Startup focused on custom software, AI, and automation solutions for business clients.

- Led technical roadmaps and architectural decisions across multiple production systems and client projects.
- Designed and implemented end-to-end solutions using Django, Node.js, React, Next.js, TypeScript, and PostgreSQL.
- Architected and implemented scalable, secure APIs with validation, pagination, transactions, and automated testing.
- Managed and optimized AWS infrastructure, including ECS, ECR, RDS, S3, CloudFront, Cognito, VPC, and IAM.
- Migrated and restructured production architectures for Calquen, Hemisferio Norte, and Marfil, establishing separate staging and production environments while reducing monthly infrastructure costs without impacting clients.
- Rebuilt the Calquen frontend and key backend components from the ground up within one month, while resolving production issues and improving the scraper and data-processing workflow.
- Designed and implemented the Icupacional product architecture and business logic from scratch, developing both frontend and backend and using AI-assisted development workflows to accelerate delivery.
- Used AI coding tools, primarily Claude Code, throughout the development lifecycle for architecture, implementation, debugging, refactoring, and feature delivery.
- Implemented CI/CD pipelines, monitoring, and automated deployments.
- Mentored junior developers, conducted code reviews, and established engineering best practices.
- Collaborated directly with stakeholders to translate business requirements into scalable technical solutions.

Marfil Platform (ERP-like system)

ERP platform for administrative, accounting, inventory, quoting, reporting, and business process automation.

Hemisferio Platform

Operations and commercial management platform for service and installation companies, including projects, quotes, task planning, reporting, and workflow automation.

Calquen

Full-stack platform for financial and accounting data management and automation, integrated with the KameOne ERP ecosystem.

Iocupacional

Web platform for managing occupational assessments, medical examinations, and evaluation workflows for healthcare centers and partner companies.

Technologies:

Technologies: Python, Django, PostgreSQL, React, Next.js, TypeScript, Tailwind CSS, PostHog, Jest, Vite, Docker, ECS/ECR, RDS, S3, CloudFront, Cognito, IAM, SES, Amplify, VPC, Secrets Manager, CI/CD, Terraform entre otros.

IMarket — Fullstack Developer (Contract)

Nov 2024 – May 2025

Software platform for administrative and accounting management.

- Developed RESTful APIs and implemented business logic and validations.
- Designed database models, migrations, and optimized queries.
- Improved performance in critical operations.
- Built reusable frontend components and responsive user interfaces.
- Implemented application state management and API consumption services.

Technologies:

Angular, TypeScript, .NET 8, C#, Docker, PostgreSQL.

Freelance Projects — Fullstack / Web Developer

Nov 2020 – April 2023

- Delivered multiple freelance projects including SPAs, PWAs, and fullstack systems.
- Transformed UI/UX designs into production-ready applications.
- Integrated frontend and backend systems using REST APIs.
- Ensured performance, accessibility, and cross-browser compatibility.
- Collaborated closely with designers using Figma and modern UI frameworks.

Technologies:

Angular, TypeScript, .NET 8, C#, Docker, PostgreSQL, Ruby on Rails, PHP, Figma, kotlin, Java among others.

AI Engineering

- **LLM Applications:** OpenAI APIs, RAG, document analysis, document classification, natural-language interfaces.
- **AI Agents:** Agent orchestration, tool calling, external system integrations, Jira, ClickUp, GitHub, automated code and task workflows.
- **MCP & Agent Skills:** Model Context Protocol, custom MCP services, Agent Skills, AI automation, reusable agent workflows.
- **AI-Assisted Engineering:** Claude Code, AI-assisted architecture, implementation, debugging, refactoring, code review, testing, and end-to-end feature development.

PERSONAL PROJECTS

StockHex — Inventory Management System

- Designed using Hexagonal Architecture for scalability and maintainability.
- Real-time stock tracking, movements, and item updates.
- Backend built with .NET 8 and SQL Server.

Tech: .NET 8, C#, SQL Server, JWT, Swagger, Docker Compose.

[GitHub Repository](#).

OwnOrbit — Lead Software Engineer

Scalable property rental management platform.

- Designed global system architecture using Microservices, SOLID, and Clean Architecture.
- Developed Node.js/TypeScript microservices with Docker and gRPC.
- Built responsive web and mobile interfaces with React and React Native.
- Implemented monorepo structure with shared packages and CI/CD-ready setup.
- Established code quality standards (ESLint, Jest, commitlint).

Tech: Node.js, TypeScript, Express, Docker, NGINX, React, React Native, Tailwind CSS, gRPC.

SKILLS

Core Stack

- Frontend: React, Next.js, TypeScript
- Backend: Node.js, Express.js
- Databases: PostgreSQL, MongoDB

Architecture & Cloud

- Microservices, Monorepos, Clean / Hexagonal Architecture, SOLID
- AWS (ECS, RDS, S3, CloudFront, Cognito, IAM, VPC)
- Docker, CI/CD, Terraform, NGINX

Tools & Practices

- Git, GitHub, Postman, Swagger, Jest, PostHog
 - Agile / Scrum, Code Reviews, Technical Documentation
-

CERTIFICATIONS & AI TRAINING

AWS Certified Cloud Practitioner - Ongoing

Anthropic Education

[Introduction to Model Context Protocol - Anthropic Education](#)

[Claude Code in Action - Anthropic Education](#)

[Introduction to agent skills - Anthropic Education](#)

[Building with the Claude API - Anthropic Education](#)

EDUCATION

Systems Engineering - Universidad Tecnológica de Santiago (UTESA) — 2017–2024

LANGUAGES

- Spanish: Native
- English: Intermediate (B1 – improving, technical communication)
- French: A1
